CLOUD SOLUTIONS
FOR ANY WORKLOAD

oasis

VIRTUAL PRIVATE CLOUD

Cost-efficiency
Flexibility
Convenience

Best for custom application hosting, unpredictable workloads, standard processing and storage, complementing on-prem infrastructure

VIRTUAL PRIVATE CLOUD+ DEDICATED RESOURCES

Customization
Performance
Consistency

Best for allocation of challenging workloads, advanced server configuration, workloads with high CPU/GPU/RAM requirements

PRIVATE CLOUD

Control
Structure
Separation

Best for controlling the hypervisor layer, meeting regulatory compliance requirements, consistent resource demands
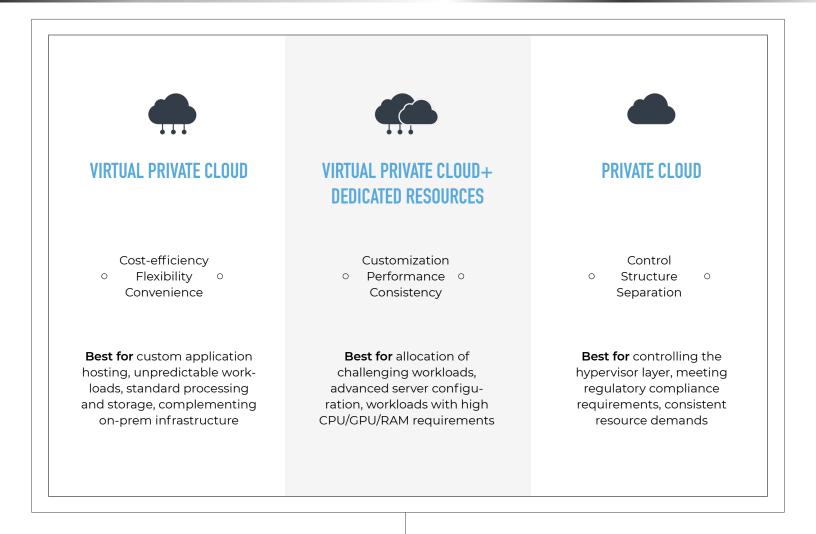

PROTECTED BY OUR ENTERPRISE SECURITY PROGRAM

We build environments that prioritize information security. In addition to the layers of physical security provided by our tier 4 data center (armed guards, monitored surveillance, biometric verification, and more), your resources are guarded by Oasis' multi-layered physical and virtual security: 24/7/365 full-spectrum monitoring, AI-driven threat detection and prevention, fully redundant hardware, and so much more.

CLOUD SOLUTIONS
WITH BENEFITS

SECURITY

Each cloud configured around security

- Continuous system health monitoring
- Weekly vulnerability scanning
- 24/7 chain of custody media handling
- Data encryption at rest & in transit
- Full environment replication
- Endpoint defense using non-signature-based technology
- Firewalls with redundant gateways
- Full packet capture
- Biometric and proximity card access
- Armed guards and monitored surveillance

PERFORMANCE

Compared to AWS

- 28x higher max IOPS
- Quadruple the network core bandwidth
- Double the VM bandwidth
- 99.99% uptime
- No upload size limits
- Up to 55kW per cabinet
- RPO 5 minutes vs. 4 hours
- RTO 4 hours vs. 24 hours

THE OASIS ADVANTAGE

Always included

- Performance Optimization
- Secure Configuration
- Hardware Management
- O/S Maintenance and Patching
- Application Maintenance
- Resource Monitoring
- Backup and Active DR
- Granular Access Control
- Incident Response
- Experienced Support Team
